

JOSE DIAZ MORENO

SENIOR FULL-STACK DEVELOPER / TEAM LEAD / CTO

"Commitment to continuous learning and growth is key to success."

<who_i_am>

With 15+ years of experience in software development, I am highly skilled in building scalable and clean code software. Passionate about crafting efficient and effective solutions and have successfully led software development teams through the entire development process, from conceptualization to deployment in production environments.

I constantly seek to improve and grow professionally and am fearless in taking on new challenges. My strong desire to learn and evolve helps drive my success in the field.

Have a track record of consistently delivering high-quality software solutions to my clients and am dedicated to achieving optimal results.

I am confident in contributing value to any project and am eager to apply my skills and expertise to new opportunities.

</who_i_am>

<job_experience>

CEO / CTO / Freelance

January 2009 – now · 11 years and 9 months

Codelabs.studio (my company for freelance jobs)

Created landing pages, e-commerce & business sites, mobile applications & e-books.

- customer relationship about needs and feature planification.
- manage product design and specifications.
- project outsourcing when needed.
- meetings with customer and team.
- tasks and timing management.

Diverse technologies used according the specific needs of the client. Development for internal and external projects using technologies like PHP, Laravel, Symfony, Go, Python, Docker, Kubernetes, JS, Node.js, Typescript, React, VUE, jQuery, API, MongoDB, Firebase, MariaDB & PostgreSQL.

Head of IT

May 2021 – now

IMCW Europe (part of IMC Worldwide)

- IT team management of 5 people.
- Hiring and onboarding processes.
- Managing in-house and outsourcing projects.
- Improved internal processes for: Development, Testing & Deployment.
- Docker, PHP 8, Laravel, Symfony 4.

Senior backend developer

May 2020 – April 2021 · 12 months

Docline

- Worked on white label product.
- PHP 7, Docker, Node.js, PHPUnit (tests).
- Laravel 6 & Symfony 4.
- Refactoring different monoliths into microservices.

Senior backend developer

December 2019 – April 2020 · 5 months

PadelManager

- Created first microservice in the company using Laravel 6 & API for managing payments from different products of the company.
- Created documentation based on Swagger OpenAPI.
- Implemented Docker in the company for virtualize and unify development environments: PHP, Nginx, Apache, Redis, MariaDB & MySQL.
- Implemented habits for Unit and functional testing with PHPUnit.
- Started Scrum as agile methodology.

CTO / Lead developer

December 2015 – December 2019 · 4 years

Fishfishme, Inc. (San Francisco, USA-based company)

The company moved from Dubai to San Francisco, USA, for VC investing. Different remote teams spread worldwide: India, Egypt, Dubai, Malaga (Spain) and San Diego (USA), which became a challenge in terms of communication and work due to time differences.

- Implemented some Agile Methodologies and improved processes which increased the team speed by 50%:
 - Use of Scrum methodology as Scrum Master.
 - Creation of staging servers for testing worldwide.
 - Workflows redesign: version control, coding standards (PSR), coding good practices and deployment process.
 - Unified framework and libraries using Symfony & Docker.
 - Started using JIRA, Slack & Git.
 - Use of PHPUnit for unit and functional testing methodologies.
 - Improved deployment to production from GitHub repository.
- Hiring process and onboarding 6 team members.
- Training the team in new workflows and work tools to improve performance.
- Whole new implementation of the server infrastructure on Amazon AWS (EC2, RDS, ELB stack configuration) which improved server power by 25%, cutting the expenses by 50%.
